

Agenda

10:00 Registration and tea/coffee

10:30 Welcome

Introduction to the day from the Chair | Simon Roberts, Centre for Sustainable Energy (CSE)

10:45 Session 1: Local low-carbon retrofit challenges and the Green Deal

Putting the issues in context | Phillip Morris, CSE

11:15 Session 2: What we already know about low-carbon retrofit (case studies)

Case study 1: Target 2050 | Catrin Maby, Severn Wye Energy Agency (SWEA)

Case studies 2 & 3: Somerset West Hard-to-Treat and Freedom from Fuel Poverty | Mike McClelland, CSE

Followed by: a question to the audience (*"What have you learned so far from any retrofit projects in which you've been involved?"*) and questions to the panel

12:30 Lunch

13:30 Session 3: What the Green Deal might look like

DECC perspective: potential models of operation | David Purdy, Department of Energy and Climate Change

Perspective of an energy supplier | Steven Millward, Scottish and Southern Energy

A possible local delivery model: the Green Deal Local Incubator | Janine Michael, CSE

Questions to the panel

14:30 Session 4: Demand creation and the Green Deal

The bigger picture: why we may need to do more than the Green Deal | Catrin Maby, SWEA

Making low-carbon retrofit 'normal': the potential value of community and neighbourhood-based approaches | speaker tbc from a neighbourhood community interest group

Followed by: a question to the audience (*"What do you think would help stimulate take-up of low-carbon retrofit?"*) and questions to the panel

15:20 Tea & coffee

15:45 Session 5: Developing the supply chain for local economic benefit

Advice, accreditation and organising local contractors | Kaye Welfare, SWEA

Organising the whole supply chain to create local benefits | Phillip Morris, CSE

Followed by: a question to the audience (*"How important is the local supply chain to your view of the Green Deal?"*) and questions to the panel

16:45 Session 6: What next?

Concluding comments | Simon Roberts, CSE

17.00 Finish
