Smart and Fair? Offer Profiling Tool

The Offer Profiling Tool was built as part of *Smart and Fair?*, our project exploring social justice in the future energy system. [Click here to read more about *Smart and Fair?*](#)

The tool provides a framework to assess systematically the capabilities and characteristics required for households to participate in one or multiple smart energy offers. Based on the Capability Lens, the Offer Profiling Tool is an Excel spreadsheet (.xlsm) and currently a beta version.
